

We Enjoyed

A very unusual demand for fine Cotton Goods the past week, a demand that would have exhausted the supply of any other stock but ours. For the present week we reduce our prices on a large number of pieces of fine imported ORGANDIES, IRISH LINENS, JACONET DUCHESSE, FINE LAINES, etc.

This is one of the largest purchases of very fine WASH GOODS that we have ever made, and the display will be a delightful revelation to every woman—particularly the amazingly low prices.

AT THE GINGHAM COUNTER

YOU'LL FIND a choice array of styles and qualities. The fine Scotch Gingham, in plaid and corded stripes, at 25c a yard.

The imported French Gingham at 25c a yard.

Fine Zephyr Gingham, 16c and the more popular priced Gingham, styles and corded good, at 12 1/2c, 10c, 8c, 6c a yard.

For Shirt Waists, we suggest Percales, in green, yellow, blue, pink, navy and other colors, 12 1/2c a yard.

Or Salen Chees—your almost say they were silk—20c a yard.

SPECIAL FOR MONDAY: 25-inch Dress Percales, dark colors, 10c goods, 7c.

Samples of any of these, if you say so. Any TRIMMED HAT in our house at one-fourth of the regular price.

L. S. Ayres & Co.

THE GREAT MONDAY WINDOW BARGAIN Touching High Water Mark

A June freshest sweeping out goods before involving.

ONE WINDOW—Fifty—no more, no less—Hattian Rockers. Regular price \$0.50 to \$15. Choice \$3.95

ANOTHER WINDOW—Complete line of French and English Cretonnes. Regular price 55c to \$1.50. Now go for

21c As many yards as you want till the goods give out.

EASTMAN, SCHLEICHER & LEE.

ART EMPORIUM. Telephone 500.

RUNNING RACES FOR THIS CITY.

L. H. Hatch's Proposition Considered by the Driving Club.

Lawrence S. Hatch, of St. Louis, was before the Indianapolis Driving Club, last evening at the Grand Hotel, with a proposition to hold a running meeting, lasting fifteen days, on the fair grounds track. Mr. Hatch, who is a son of ex-Congressman Hatch, is a starter of horses running under the Turf Congress rules, and has just closed a three weeks' meeting at Nashville. In his proposition, Mr. Hatch, as a horseman, he represents, he says, a syndicate of running horse owners in Chicago and St. Louis. His proposition is to conduct the meeting for the driving club and to take a per cent. of the net receipts, or to rent the track of the club for the event. The club, Mr. Hatch thought, was rather inclined to accept the first of the two offers.

After the conference, lasting about an hour, Mr. Hatch retired, and the directors might talk over the subject. They conferred among themselves for twenty minutes, and then announced that they had not and could not last night reach any conclusion. Mr. Taggart said that nothing could be positive until the middle of this week, as Mr. Hatch would have to submit any proposition or agreement to his backers, which would take several days. If the matter is ordered it is expected to begin June 20, and will run until July 4, inclusive. Mr. Hatch said last night that there are several hundred horses now waiting for engagement, owing to the activity of the Civic Federation in Chicago closing up the track and regarding the plan of the Illinois Legislature to legalize pool selling.

GEN. HARRISON RETURNS HOME.

He Will Spend July and August in the Adirondacks.

General Harrison arrived home yesterday from the East, where he has been engaged on some legal business and in recuperation, with an occasional sitting for an artist. He was met at the station by his secretary Tibbot and, entering a carriage, they drove to the General's home. A number of persons who recognized him at the station rushed up to shake hands with him, among them some children. They were not disappointed. The General will spend July and August in the Adirondack mountains. Interviewers were able to induce him to talk about the hot weather while in the East, but not on the subject of politics. He said, however, that he knew Judge Harmon, of Cincinnati, who has been appointed Attorney-General by President Cleveland, and that he was going to see him. He said he was very glad to see him, and that he was very glad to see him, and that he was very glad to see him.

TAGGART STILL HOLDING OFF.

He Is Not Yet Ready to Call a Democratic Money Convention.

A majority of the executive committee of the Democratic State Editorial Association is in favor of the free coinage of silver. It is understood that at the coming convention of the association an effort will be made to pass resolutions indorsing the action of the Illinois Democratic committee. It will be further suggested that the State Democratic committee call a meeting for a discussion of monetary matters. Chairman Taggart has all along objected to such a convention being called, and continues to insist that such a move should be made by John G. Shanklin and John R. Stoll, who are to speak for the editorial convention, are pronounced friends of free coinage.

Office Desks of all styles—Wm. L. Elder.

THE RINGSTERS WON

BEER AND MONEY VINDICATED THE SCHOOL BOARD MAJORITY.

Gas Companies and Brewery Syndicate Aided the Election of Roth, Russe and Adam.

These people who watched the progress of school districts Nos. 4, 7 and 8 yesterday gained a very fair idea of some political evils as Dr. Parkhurst had to encounter in New York, but in Indianapolis it was different in this respect: The efforts of the good citizens could not prevail against the tactics used to re-elect three of the notorious School Board clique. Roth, Russe and Adams were re-elected and it was truly a vindication—a vindication of the boats made by the breweries and saloon men that they would elect these men. There was a reversion to such methods as the people of Indianapolis believed were indigenous to Tammany Hall and the slums of New York and Chicago.

The proclamation of the Mayor closing all the saloons in the city for the day, while, no doubt in accordance with the law and his regard for public duty, had the effect of concentrating many saloon keepers in these districts, where they took off their coats and worked for the brewery forces.

In the Fourth district the forces of Mr. Chandler were unable to successfully compete against forces strengthened by the barrel of money that was poured into that district. Beer had flowed like water during the two weeks preceding the election, and the drinking to the effect of the Democratic ward heelers were re-enforced by employees of the Consumers' Gas Company, Indianapolis Gas Company and the brewery syndicate. In the Seventh district some similar tactics prevailed, although the opponents of Roth were not so confident of encompassing his defeat. The vote in the Fourth district was as follows:

Russe's majority.....596

Chandler.....741

The following was the result in the Seventh district:

Roth's majority.....627

Magill.....529

The result in the Eighth district is as follows:

Adam.....1,420

Williams.....1,075

Adam's majority.....344

THUGS AND GAMBLERS.

Disgraced Element That Adam Had

The voting place of the Eighth district, Virginia avenue and School street, was surrounded by a crowd all day. Mayor Denny's proclamation closing the saloons had the effect to arouse all the saloon keepers in the district, who came in bugles, whistles and carriages and with money to work for the re-election of Charles Adam. The gang which worked and tolled all day for Adam, as if his success meant bread and butter to them, was a disgrace to a school election. A tougher crowd was never gathered at any voting place in the city. It seemed as if the worst Democratic element of the entire city collected to aid Adam. Scores of those present have no residence in the Eighth district, and many stood around awaiting a chance to vote. Several attempts were made to vote strangely, but William Milford, who stood guard for the Williams forces, has a pretty good acquaintance in the district, and he succeeded in preventing many fraudulent votes. One of the most conspicuous figures about the poll was "Goose" Eden, of workhouse fame. He drove a trap, and worked as hard for the success of Adam as he did some months ago in the interest of "Dayton Sammy," a noted pickpocket, in jail at Greensburg. Eden, who had been in the week was fined in Police Court for beating a small boy, was one of Mr. Adam's most ardent supporters. Rakhe well-known as a gambler, and his reputation is anything but enviable. It will be recalled that he recently figured in another case at Broad Ripple, where he was drinking with three young girls of the city. He was arrested, but unfortunately, Rakhe left them shortly before "Cale Johnson had his back out working for Adam. Johnson, a character known to the police, having figured in several questionable cases, was for a time ran a place on West Washington street which did not bear the best of reputations. At the time of the election, Mr. McKee, two of the boys, who had two unknown friends with them, the McKee's have been arrested time and time again for picking pockets and fighting, and many months of their lives have been spent in the workhouse. They are now working with a great deal of influence, but Mr. Adam not only owned several votes in the "Goose" Eden, but another well-known Democratic politician present, "Governor" Morton, who has been a mouthpiece for the detective department, particularly the detective department, Larry McKee bartender and lever sport, and "Goose" Eden, who was the detective department, and Larry did what he could for his friend. Joe Wagner, Sim Coy's old time partner, who was arrested for the election, and pushed the Adam voters forward, giving to them a considerable amount of money.

WHEAT CROP ESTIMATES.

Letters from Near-By States Show a Failure of the Crop.

A few days ago Mr. J. B. Heywood, of the McCormick Harvesting Machine Company, wrote a number of letters to agents of the company in near-by States making inquiries concerning the condition of the wheat crop. The replies all show that not a great deal can be expected of the crop in the northern part of the middle States. From Kentucky, where the crop is reported that the percentage of the average of the wheat crop will be about one-third short, yet a better crop than last season is expected. At Quincy, Ill., the outlook is poor, with not more than a fourth of the average crop in prospect. The drought, Hessian flies, army worms and the rust will keep the crop in eastern and southern Illinois down to the same percentage of an average. The general agent at St. Louis says the crop in his territory is about one-fifth of an average. The oats crop is also a virtual failure. From Evansville, Ind., where the crop is reported that the percentage of the average of the wheat crop will be about one-third short, yet a better crop than last season is expected. At Quincy, Ill., the outlook is poor, with not more than a fourth of the average crop in prospect. The drought, Hessian flies, army worms and the rust will keep the crop in eastern and southern Illinois down to the same percentage of an average. The general agent at St. Louis says the crop in his territory is about one-fifth of an average. The oats crop is also a virtual failure. From Evansville, Ind., where the crop is reported that the percentage of the average of the wheat crop will be about one-third short, yet a better crop than last season is expected. At Quincy, Ill., the outlook is poor, with not more than a fourth of the average crop in prospect. The drought, Hessian flies, army worms and the rust will keep the crop in eastern and southern Illinois down to the same percentage of an average. The general agent at St. Louis says the crop in his territory is about one-fifth of an average. The oats crop is also a virtual failure. From Evansville, Ind., where the crop is reported that the percentage of the average of the wheat crop will be about one-third short, yet a better crop than last season is expected. At Quincy, Ill., the outlook is poor, with not more than a fourth of the average crop in prospect. The drought, Hessian flies, army worms and the rust will keep the crop in eastern and southern Illinois down to the same percentage of an average. The general agent at St. Louis says the crop in his territory is about one-fifth of an average. The oats crop is also a virtual failure. From Evansville, Ind., where the crop is reported that the percentage of the average of the wheat crop will be about one-third short, yet a better crop than last season is expected. At Quincy, Ill., the outlook is poor, with not more than a fourth of the average crop in prospect. The drought, Hessian flies, army worms and the rust will keep the crop in eastern and southern Illinois down to the same percentage of an average. The general agent at St. Louis says the crop in his territory is about one-fifth of an average. The oats crop is also a virtual failure. From Evansville, Ind., where the crop is reported that the percentage of the average of the wheat crop will be about one-third short, yet a better crop than last season is expected. At Quincy, Ill., the outlook is poor, with not more than a fourth of the average crop in prospect. The drought, Hessian flies, army worms and the rust will keep the crop in eastern and southern Illinois down to the same percentage of an average. The general agent at St. Louis says the crop in his territory is about one-fifth of an average. The oats crop is also a virtual failure. From Evansville, Ind., where the crop is reported that the percentage of the average of the wheat crop will be about one-third short, yet a better crop than last season is expected. At Quincy, Ill., the outlook is poor, with not more than a fourth of the average crop in prospect. The drought, Hessian flies, army worms and the rust will keep the crop in eastern and southern Illinois down to the same percentage of an average. The general agent at St. Louis says the crop in his territory is about one-fifth of an average. The oats crop is also a virtual failure. From Evansville, Ind., where the crop is reported that the percentage of the average of the wheat crop will be about one-third short, yet a better crop than last season is expected.
